Left to right 2nd row: William Fisher, Gerald Allison, Lee rubaker, Leon Weaver, Donald Zimmerman, John Campbell, Richard Martin, Wilmer Martin, James Sensenig.

Farm Visits To Be Fewer County Agent Predicts

The work of the county agent will become more and ore that of a coordinator, County agent M. M. Smith said hursday night.

He said the shift to subur- n living by large numbers people will put pressures the county agent's office use more mass media for dissimination of information. The demonstration method and the farm visit, long a standard proceedure of the extension worker, will have to give way, in part, to the use of the press, radio, and television to reach the public.

Smith reassured the 300 farmers and families at the annual Extension Associa-

Gold Medal Won y Penn Manor uture Farmer

Melvin Dombach, Lancast- R6, this week won a ld medal in the project ok contest sponsored by e Pennsylvania Associa- n of Future Farmers of merica.

Melvin, the son of Mr. d Mrs. Albert Dombach, ok one of the top prizes in e state contest with his cords on a project of nine ood sows and their litters. The nine gilts in the pro- t last year weaned 72 s and averaged just over e pigs per litter farrowed gh litter weight for the rkshire and Landrace - rkshire crossbred gilts s 360 pounds at 56 days. Judges in the contest scor- the record high on feed iciency as well as the d litter weights.

Melvin, who will gradu- from Penn Manor High ool in June, plans to en- farming in the Millers- e area.

New Holland FFA Has Boys Chorus

Shortly after the Garden Spot High School's FFA was organized last year, several members of the Grassland Chapter expressed an interest in an FFA Chorus. With this group as a nucleus, Miss Alice Jane Smith, music instructor, worked with the group during club periods. The groups first public appearance came during the first annual FFA Parent - Son banquet last year.

This year the group added several new members and continued their rehersals They participated in the school's annual Christmas program with FFA member Wilmer Martin singing a solo in the program. At present the group is working on a brief program which will be presented at the annual FFA Parent-Son Banquet to be held on April 7th.

This FFA Chorus illustrates the cooperation that can and does exist between the Vocational Agriculture Department and the other departments in the high school

Program of Work Has Variety At Solanco FFA

By: Harold Redcay

The activities completed this school year by the Solanco Chapter of the Future Farmers of America include a turkey shoot, a dance, a roller skating party, and the sponsoring of an FFA calendar. Our seed service program is now in progress. We plan to sponsor the sale of Spanish onion seedlings in our area in the spring.

Two members of this chapter received the Keystone Farmer Degree and seven members received the Red Rose Degree. The Lancaster County FFA vice -

Corn Project Completed By Cocalico FFA

Cocalico chapter FFA has completed a corn growing project of four acres, Jerry Snader, farm management committee chairman, reports

The project demonstrated the economy and value of following fertilizer recommendations determined from a soil test Snader said. The value of atrizine for weed control was demonstrated with good results.

Two varieties, Penna. 820 and Penna 840 Hybrids were planted with the Penna. 820 giving better results in most respects.

Exhibits of the corn won a first place and two second

Manheim FFA Buys Top Boar At State Sale

Manheim Chapter Future Farmers purchased the champion boar at the State Yorkshire show and sale last Saturday at Kutztown.

The boar which will be used by the members of the chapter in their Supervised Farming Program was bred and consigned to the sale by Parke Thomas, Beavertown.

A litter mate of the boar was top carcass barrow at the Ohio invitational show last month. He is of the same breeding as the grand champion gilt at the National Yorkshire Show in Iowa last month.

The 6½ month old boar will be housed by Harold Hess, a sophomore student in vocational agriculture at Manheim Central high school. Harold, the son of Henry G. Hess, Manheim R3, purchased two purebred Yorkshire bred gilts for himself at the sale.

The boar will be rotated on a schedule set up by the FFA chapter.

Control More Processes Farmers Urged By Co-op

The farmer of the future will be producing a given crop of a given quantity, of a given quality, at a given time under contract and selling through a source type of distribution, farmers were told this week.

George G. Connor, executive vice president and general manager of the Pennsylvania Farm Bureau Cooperative Association, speaking at the annual meeting of the county association in the Pequea Valley High School Thursday, said he looks for more integration in the farming picture in the future.

He pointed out that not one producer-retailer sells milk in the Harrisburg area at present. He contrasted this with the possibility of total integration of the poultry industry in Lancaster county. He said a poultry man can purchase all his supplies and services thru farmer cooperatives and

Water Runoff Is Problem of County SCD

It is not lack of water but lack of proper use of the water that is the problem, John Kitch, service forester, said this week at the regular meeting of the Lancaster County Soil Conservation District.

Kitch pointed out that the city of Baltimore has only 476 square miles of water shed, an area about as large as the one feeding the Conestoga, to supply water to 1,400,000 customers.

Varied Program Is Reported By Lampeter FFA

By: James Shertzer

Our FFA chapter has a varied amount of activities throughout the year. At present we are getting ready for our assembly program, which takes place during FFA Week. We will try to give the students a better conception of FFA and its purpose through the assembly program.

During the months of January and February we conduct our annual seed service for the farmers in our community.

In March, the members with special talents participate in the annual county athletic program In March also we will hold our annual Father and Son banquet.

April is the month of our Scrap Drive. We take trucks to the farmers in the townships and ask for donations of their scrap metal, bale twine and paper. Our chap-

Unique Program At Penn Manor Is Discussed

By: Dave Siegrist, Reporter

A new program of work has been put into effect in the Manor FFA Chapter. The Penn Manor school board assumes responsibility for all expenses of a club, activity or sport; however, any money earned by the FFA or any other club, activity must be turned over to the school board.

So far as we know, this is the only school in the county with such a program. Opinions on the program are

Manheim FFA Public Speakers Reveal Subjects

By: Harold Myers, Reporter

It is "Public Speaking Time" at Manheim FFA. Each Member of the Manheim Central FFA is presently engaged in writing a speech to be delivered from memory to his classmates.

This single area of instruction is a part of the total vocational agriculture program at Manheim. The primary objective is to enable the student to acquire some ability in leadership and gain self confidence.

Each officer in the chapter prepared the following summary of his speech:

Richard Hosler, president: The title of my speech is "The Farmer's Challenge". In my speech I explain the farmer's challenge as I see it. The challenge is a series of problems which the farmer must overcome and at the same time make a living. Such problems are the imballance of production, expansion of the domestic market, and expansion of production to meet the foreign demand.

Dave Graybill, vice president: My speech, One Step From Destruction, points out the destrutcive processes and forces of erosion. I point out that erosion is ruining the soils of Pennsyl-

SHEEP 6. Not enough on sale to establish a market.

New Holland

Slaughter Steers Lower

Slaughter steers sold 25 lower at the February 16th auction at the New Holland Sales Stables. Cows comprised 40 per cent of the run of 933 head of cattle. Cows were 1.00 to 1.50 lower while bulls were 50 to 1.00 higher.

The bulk of the choice grade slaughter steers made 26 to 27 60. Several 990 to 1,110 pound went to 27.75 to 28 10. Good to low choice brought 24 to 26 with standard down to 21.75.

Cutter and utility cows made 15 50 to 17 25 with canners and low cutters at 14 25 to 15 50. Shelly canners were down to 12

Utility and commercial bulls brought 20 50 to 24 with a few to 24.50

A few lots of good 840 to 963 pound feeder steers sold 24 35 to 25 10

Calves: 375 Vealers sold 4 00 lower. Good and choice vealers made 28 to 35, prime and choice 36-42 and a few up to 43. Standard and low good 21 to 28. Utility 18 to 21.

The February 15 sale of dairy cattle saw the market continue steady but very slow. Receipts of 92 cows, eight stock bulls and two stock heifers continued at about even prices

Fresh cows, Holsteins $300-525, Guernseys - $185-225, other breeds - $185-250 Stock bulls - $90-130 Stock heifers - $45-110

The February 13 horse sale featured a load of Kansas mules that sold from $500 to $695 per pair A few odd head of mules in this load sold from 210 to 250 per head

Receipts included 191 head of horses, ponies and mules. Mules, pair - $300 695 singles - $150-250 Ponies geldings - $45-110. Riding horses - $110-230. Driving horses - $110-165 Killers 8½ to 9 cents.

Milk Market

(From page 3)

mostly unchanged to slightly higher at Atlanta On the west coast supplies were generally at a seasonal low.

Offerings were fully ample to burdensome at all markets though surplus was light at Atlanta and on the west coast Bottling demand was fair.

With the start of the lenten season, cottage cheese movement improved in some areas. Excess over class one needs diverted to manufacturing channels, mostly separators.

Wholesale selling price at New York was unchanged at $5 18 per 40 quart unit

Delmarva - Georgia

Offerings Up, Clear Readily

Live offerings increased and cleared readily at slightly lower averages during the 24 hour period ending at 10:30 Friday morning.

Delmarva reported prices of 18 to 20 on 809,800 head at farms during the period.

Estimated slaughter by Eastern Shore processors for the week end was 659,000 head compared with the 582-000 head last week end.

The Delmarva broiler-feed ratio for the week ending February 10 was up two points from the previous week at 4.2. Broilers averaged 19.29 per pound and mash cost $91.90 per ton The ratio compares to 3.8 six months ago and 3.9 for the comparable week a year

Fluid Milk

Production Up Slightly Higher

Reports indicate the production of fluid milk trended seasonally higher in Pennsylvania and most of the north. Throughout New York and New England production was mostly unchanged and

FROM WHERE WE STAND -

"Living To Serve" - A Good Motto

Learning to do,
Doing to learn,
Earning to live,
Living to serve.

The motto of the Future Farmers of America gives in a capsule form, the purpose of the organization.

Future Farmers and their teachers of vocational agriculture believe in first learning to do a job properly. Future. Farmers learn in the classroom, in vocational agriculture shops, on field trips, and on other educational trips.

But, as the second line of the motto says, they a so believe the best way to learn to do a thing is to do it. Future Farmers know that they will remember longer the practices they put into use on their Supervised Farming Programs at home.

These Project programs, as they are popularly called, form the basis of the instructional program in any well designed and well operated vocational agriculture program.

The supervised farming program aids the Future Farmer to gain the goal set forth in the third line of the motto. Many millions of dollars are invested in agriculture each year by the blue-jacketed farm boys. For many of these Future Farmers, the single project in the freshman year of high school is the beginning of a farm program which will become the business and the way of life of the man.

While Future Farmers know the business of earning a living is vital to the farmer, they also be'ieve there is more to life on the farm than mere existence.

Future Farmers believe they must contribute something of themselves to the communities in which they live.

Each year the Future Farmers of America choose the week of George Washington's birthday for the observance of National FFA week.

Although usually recognized as a Revolutionary War General and our first president, Washington's first love was the farm he called Mount Vernon.

There he was among the first in the nation to practice contour farming, crop rotations, fertilization, and soil and water conservation and improvement methods.

It was more than a century after Washington's death before general use was made of many of the sound agricultural practices he advocated.

Future Farmers know they must adopt and adapt the new and proven farm practices as they become available, but they know, too, the leadership demonstrated by Washington is sorely needed in the rural areas of the nation today.

Membership in the FFA is made up of over 378,000 farm boys in over 9000 local chapters in all 50 states and Puerto Rico. The largest organization of farm boys in the world grew from a few "Agriculture Clubs" in Virginia in 1927 and 1928. The fame of the FFA has been so great that many other countries have patterned Future Farmer organizations after the one in the United States.

This country needs about 100,000 new farmers every year if we are to maintain our present production and produce the increased needs of an expanding population.

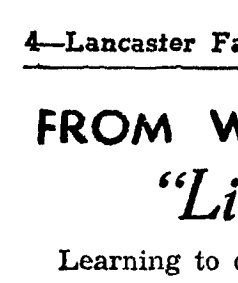
The boys studying vocational agriculture in the high schools of the nation are preparing to answer this need.

In the words of the FFA creed they say, "I believe in the future of farming with a faith born, not of words, but of deeds—in the promise of better days through better ways, even as the better things we now enjoy have come up to us through the struggles of former years."

They express their conviction and confidence in the worth of the individual farmer in the last few lines of their creed. "I believe that rural America can and will hold fast to the best traditions in our national life, and that I can exert an influence in my home and community that will stand so'id for my part in that inspiring task."

We urge you to visit your local chapter of FFA and become acquainted with the boys and their teachers. We think you will see leadership in action—leadership of the kind America needs for the days ahead.

At least that's how it looks from where we stand.



Davidson

THIS WEEK
—In Washington
With Clinton Davidson
The Rules Battle

The sole purpose of this column always has been to take our readers behind the scenes in Washington to see how the Legislative, Administrative and Judicial branches of government serve the American people.

We believe that government can be responsive to the wishes of the citizens of a democracy only to the extent that the people know and understand its functions and operations.

An informed and intelligent people are best qualified for making the decisions that will preserve our democratic institutions and keep our nation strong. The right to vote is of little value to a people who are uninformed, or misinformed.

It has been our privilege over the past thirty-odd years to observe at first-hand the legislative, administrative and judicial functions of our increasingly vast and complex Federal government, and to know personally a great many who are truly servants of the people, as well as some who were not.

Behind the Scenes

An astute visitor to Washington, even if he stayed for weeks, could see only a fraction of what goes on in the scores of congressional committees and the hundreds of administrative agencies and departments.

One of the congressional committees, for example, to which he would not be permitted to listen is the House Rules Committee. Yet that committee is one of the most important and powerful in Congress

It is because of that power and the way it is used, that the Rules Committee has become in recent years one of the most controversial in our legislative system of government. It has been described accurately as a "legislative traffic cop."

The Rules Committee never originates legislation, but it sits as a jury to pronounce what often amounts to a "life" or "death" sentence on bills which other committees approve for action, by the House of Representatives.

Appeal Procedure

All bills approved by other committees of the House must first be sent to the Rules Committee, which decides the time and under what restrictions it can be brought before the House for debate

The committee may send a bill to the House with a "rule" which, for example, permits only members of the originating committee to offer amendments. Or it may pigeonhole a bill by refusing to act on it.

That power, however, is not absolute There are three ways in which a bill can be brought to the House floor

Lord of Life

Lesson for February 19, 1961

MANY MORE people died in Palestine than Jesus brought back to life. He did not spend all his life, or anywhere near the most of it, in breaking up funerals. We hear actually of only three particular cases where he brought a dead person to life; John tells of only one, the story of Lazarus. Jesus took death as a natural end of life. It is the one event to which every one can confidently look forward. Jesus did not set out to make a holiday for death. He did not share the modern prejudice against even using such "ugly" words as "die" or "dead."

Dr. Foreman

No Tears for Lazarus

Why then did the Master weep when Lazarus died? Some think he wept for himself; but this would be most unlike him. Self-pity would be the last sin you could think of in connection with Jesus. Others think he wept for Lazarus. This could scarcely be true; for he knew he was going to restore the man to his family. Some would agree to this—Jesus did not mourn for a man death could not hold. But could he have been weeping for the opposite reason—that Lazarus had to come back to this world of pain and sin? It is more likely that Jesus' tears were not for Lazarus at all, but for the grieving sisters Mary and Martha. If he wept for Lazarus, it would be the one and only funeral that brought him to tears. It is more natural to think of Jesus as sharing the sorrow of the two sisters, as he shared the woes of the world always. He was indeed "acquainted with grief."

Man's Worst Enemy

Many people, perhaps most, think of death as the worst enemy of man. Death is called once by St. Paul the "last enemy," but neither Paul nor any other writer in Bible (except Ecclesiastes) at death as man's worst en That place is reserved for sin. damage that sin can do is w than any damage death can This is not to say that preve of death, or rather postponeme death, which is all that me science can accomplish, is worth while. If "Thou shalt kill" is a divine command, the another commandment wra up, as it were, in that one, shalt do all things possible to serve and prolong life—thine and the lives of others Never less, though the healing pr sions owe much to Christia and have contributed much, fact remains that no death ca anything but postponed, whil can actually be prevented So Lord spent most of his time breaking up funerals but in ing the power of evil It is les portant, after all, to keep from dying than it is to keep from sinning.

Two Kinds of Life

Let us turn this thought a and look at it another way important enough to be looke for a long time. Here is a ques What is the most important t in the world, to you? Many sons would come up with seems like the simple answer, life. That is a true answer haps. It depends on what kin life you mean; for there are kinds. One is the life that en the moment of death, the life is tied to your heart and h The other is the life called in Apostles' Creed the Life Ever ing, but better called in the Testament the Life Eternal. T at Bethany Jesus did not pres for Lazarus a pill or potion anteed to keep him from d again. Lazarus would die a and Jesus knew it. So did hi ters. Jesus did not offer them everlasting; they had it God made us human beings so death is not the end But the p ing, even the terrible, questio What sort of person are you to be, forever and ever? Wi the life eternal, the life everla can be an eternity of frustrati best, torture at worst. Withou life eternal, life everlasting n only existence shut away fro Lord of Life. Eternal life is kind of life that makes everla life worth the hope of man a promises of Christ.

Rural Rhythms

FEBRUARY REFLECTIONS

By: Carol Dean Huber

The children are excited
Looking all around;
Everywhere the deep drifts
Cover all the ground.

Father may not like to be
Shoveling the snow,
But the children love it.
See their faces glow!

Now Is The Time . . .

BY MAX SMITH

MAX SMITH

TO HANDLE LIVESTOCK CAREFULL The moving of all kinds of livestock is b business in this part of the state. Produ ers are urged to have needed equipme such as chutes, ramps, and a system handling cattle to keep down injury an excitement. The proper loading chute is big item with any type of livestock Plan are available for various types Every e fort to keep down bruises and excitemen will pay dividends.

TO OBSERVE SOIL EROSION—It's di ficult to detect this problem under heavy snow cover bu when the snow melts farmers are urged to notice the colo of the water to determine if any topsoil is leaving th fields Land owners that have not yet accepted contou strips on sloping fields should be especially interested the amount of topsoil that leaves the farm during the wi ter and spring months. This might be in the form of wa erosion on open ground after the snow melts, or might water erosion from too much open ground on any gi slope. Vegetative cover is very important during the wint in addition to strip farming in order to hold a maximu amount of water on the slopes.

TO FEED GRAIN ACCORDING TO QUALITY OF FO AGE—Dairymen are urged to base their grain feedi g p gram upon the quality of forage crops being fed If th varies from month to month, then it is recommended th the grain ration be altered to fit the need. A change fro good quality hay and silage to poor hay should present th need for more protein in the grain ration. The quality the forage crop can be determined through the Forage Te ing Service; we urge more producers to take advantage this testing service.

TO ATTEND LANCASTER COUNTY "SOILS DAY"—Th all-day educational meeting should be of benefit to eve farmer; many current and vital problems will be discusse The date is February 28th and the place is the Guerns Sale Pavilion. Additional details found elsewhere in th publication. We hope YOU can make it!!

SUMMARY

7,700 plus extras started — 7,700 housed

Mortality on birds bought 0%

The loss averaged about 18 birds per 1,000 birds placed (less than the extras).

Average age of birds housed	139 days
Lbs. of feed per bird raised	16.246
Total cost of production	1.62163 per pullet housed

NOTE: This shows good stock, good feed, a good program, and good management.

RECORDS ARE VITAL. In figuring your costs, divide the number of birds housed into total costs, or add your percentage of mortality and culls to your costs per birds started.

place ribbons at local fairs.

The chapter sold 108 bushels per acre in addition to the ten bushels turned over to the chapter Conservation committee for distribution to mall game during the winter

Another successful program of the chapter was the pest control project in which 100 pounds of rat bait was mixed and distributed through the community. The service, as usual, was offered to patrons at cost

The formula of 11 pounds of cornmeal, six pounds of rolled oats, one pound Warfarin, one pound confectioner's sugar and one pint of vegetable oil again proved effective as in the past campaigns.

Members of the Cocalico chapter brought first and second prize in Vocational Hampshire Swine back to the county from the Farm Show last month First place was scored by Jerry Snader's gilt while Robert Hoover showed his gilt to second place.

At the present time, members of the chapter are preparing for a public speaking contest to be held at the school during National FFA Week The boys also have tickets and are looking forward to attending the Ice Capades as a group this month.

This Week

(From page 4)

without consent of the Rules Committee On "calendar Wednesdays" the chairman of the various committees may bypass the Rules Committee and present legislation to the House. That, however, is a procedure seldom used or successful when attempted.

Also, the House by a two-thirds vote can suspend the rules and decide to take up any bill it wishes. And a majority of the 437 members may sign a petition to take a bill away from the Rules Committee.

The Rules Committee in a way performs the same function as a traffic cop on a busy intersection in that it controls the flow of bills to the House, makes for orderly legislative procedures, and prevents legislative log-jams

Farm boys train for future leadership roles by following parlimentary procedure in their FFA meetings and taking part in public speaking contests.

Approximately 300 business concerns, organizations and individuals make annual contributions to the Future Farmers of America Foundation, Inc, which provides a national awards program for FFA members.

Pest Detectives

Pest Stopped Every 17 Minutes

An inbound plant pest was stopped every 17 minutes on the average at U. S. ports of entry in 1960, the U S Department of Agriculture reported today.

U S defenses against crop and livestock diseases, harmful insects, and other farm pests were stregthened during 1960, but even so some pests succeeded in invading this country. The African red tick was found in New York and Florida, and the cattle fever tick was found in Florida Oriental fruit flies were found in California

And demonstrating the speed with which an uncontrolled new pest can spread in the jet age, the face fly had been found in 24 States by the autumn of 1960 Ths foreign livestock pest first became troublesome in theU S only during the previous year

Regulatory agencies of the USDA's Agricultural Research Service intensified efforts in 1960 to bar foreign pests from entering this country and to wipe out or control those that have already entered Their work is helping especially to prevent pest invasions favored increasingly by today's speed of transportation and record-breaking travel

More than 800,000 animals and poultry passed quarantine inspection for entry into the United States in the year ended June 30, and 20 738 others were rejected More than 120 000 pounds of prohibited or restricted foreign meats were confiscated from foreign ocean vessels or aircraft or at points of entry and post offices

Every 17 minutes, on the average, ARS inspectors stopped an inbound plant pest at U S ports of entry There were about 161½ million inspections of travelers entering the United States during the year—many of them repeats This was an increase of almost 4 million over the preceding fiscal year

Plant pest control workers inaugurated a cooperative program to eradicate the golden nematode, potato and tomato pest, from Long Island, N Y, where it has been kept under strict control for 19 years They also helped Illinois and Michigan halt the westward movement of the Japanese beetles and applied treatments to eliminate all known infestations of khapra beetles in the United States and Mexico

The national fight against brucellosis, costly disease of livestock, entered a new phase when New Hampshire was pronounced brucellosis free — the first state to so qualify Modified - certified status, an intearmediate step in the eradication effort, has been achieved by 26 states

Each working day, Federal meat inspectors kept about one million pounds of unfit meat from U.S dining tables During the year ended June 30, meat from more than 107 million animals was inspected and passed at 1,396 meat-packing establishments in 572 U S cities

About 40,000 labels and sketches for use on Federally inspected meat and meat products—both domestic and imported — were reviewed to see that they contained the required consumer information and that no misleading statements or symbols were included

Nearly 500 — more than 86 per cent — of the Federally inspected meat-packing plants throughout the U S are now slaughtering one or more species of livestock by humane methods in accordance with requirements of the Humane Slaughter law which became effective last July.

Corn Growth Is Much Faster On Windy Days

Corn yields may be reduced if lack of air movement for a number of sunny days prevents plants from getting sufficient carbon dioxide to sustain maximum growth, according to research by the U S Department of Agriculture and Cornell Univerhity

Findings in studies directed by R Lemon of USDA's Agricultural Research Service and Robert B Musgrave of Cornell University, suggest that the rate of photosynthesis on sunny days is determined largely by the rate of exchange of carbon dioxide between air and corn. About 80 percent of the carbon dioxide needed by corn must be brought from outhide the field by air movement.

Light, another important factor in corn growth, strongly influences the use of carbon dioxide by plants. As light intensity increases, so does the amount of carbon dioxide used. The more carbon dioxide available, the more the plants use, particularly when light intensities are high.

In evaluating effects of light and carbon dioxide on corn growth, the ARS scientists compared measurements from plants in a field with others made by Cornell researchers from field plants enclosed in a plastic growth chamber The enclosed chamber permitted accurate measurements of environmental conditions — temperature, humidity, and changes in the amount of carbon dioxide used when light intensity changed. The amount of solar radiation absorbed by the crops was also measured.

Data from the field were compared with those from instruments inside the plastic growth chamber. On days with little wind, environmental differences between the growth chamber and open field were small, the rate of photosynthehi both places increasing light intensities increased.

Late in the morning rate of photosynthesis in chamber stopped increas when the maximum rate lowed by the carbon dio level was reached.

A Canadian Layer
IN PENNSYLVANIA

The great Canadian-bred layer, Shaver Starcross 288, finished in the first quartile in the Pa. Random Sample test, topping all other internationally franchised breeds, with the following statistics:

Eggs per hen housed	245.6
Feed per 24 ounces of eggs	4.2 lbs.
Laying house mortality	8.3%
Percentage large eggs last month of test	98.0%
Net income over feed & chick cost	$2.85

● Water Runoff

(From page 1)

The reason such a large quantity of water can be utilized from a relatively small area is wise use of the water, Kitch said. Through the use of three large reservoirs, most of the water falling on the area can be saved for use.

The rate of flow in the Conestoga Creek has a range of one to 3,000, Kitch pointed out This means there is 3,000 times as much water flowing at highest period of flow as at the time of lowest flow. If the water could be released gradually from the watershed, the range could be reduced greatly.

The district approved the applications for conservation plans of six new cooperators. The farms, in five townships, make up a total of 395 acres. Cooperators, address, townships and acreage are G. Jay Umberger, Denver, West Cocalico, five acres; Richard R. Gerlach, Manheim R3,, Penn, 48 acres; Paul E. Stauffer, Mount Joy R2, Mount Joy, 30 acres; Jesse B. Dourte, Manheim R2, Rapho, 79 acres; H. Raymond Stoner, 1051 Eden Rd., Lancaster, Manheim, 106 acres; Harry Rose, Elizabethtown R3, Mount Joy, 127 acres

● Manor

(From Page 1)

varied. The president of the Key Club feels that the program has destroyed the ambition or purpose of the Key Club or any other club. The FFA president feels that it is good in that it takes off the burden of worrying about financing a club; however, he feels it has cut out a big part of our program such as the seed service where we earned some money and learned in the process. Members of the FFA are now allowed to purchase seeds only for themselves Whether these opinions are good or bad, the program has changed many functions in the school clubs.

Dorothy Kauffman this year became the first FFA Chapter Queen at Penn Manor. Dorothy, a senior, is the daughter of Mr. and Mrs. Ralph Kauffman, Conestoga R1 Dorothy received a gift in an assembly program at school and she will receive an official FFA Queen jacket at our banquet. She will represent the FFA in the Bicentennial parade in Millersville this summer

At the present time our chapter is making plans to rent a plot of ground for growing "multiple ear" corn.

We feel we have a good program in which everyone can have a part

● Lampeter

(From page 1)

ter uses this project as a fund raising program

During June, our chapter will send representatives to the annual FFA Week activities at Penn State University Last year our dairy judge, Roy Breneman, won second place in the state This won him a trip to the National Dairy Cattle Congress at Waterloo, Iowa, and here he placed in the top 20 in the nation.

Our recreational and educational trips will be taken sometime in July or August. Last year we went deep sea fishing at Indian River, Del. for our recreational trip, and toured Walker-Gordon Dairy Farms in New Jersey on our educational trip

During the staging of the Lampeter Fair, our chapter sells soft drinks as a fund raising program, but we also serve on committees to set up the fair and to clean up afterwards.

A Halloween party in October in the barn of one of our members and a trip to a sporting event will round out our year's activity

In our chapter all members can participate in these activities With a well balanced program of activities such as ours, each member has a chance to participate and benefit from it

Shrimp Ahoy

By Mrs. Richard C. Spence

In the next few weeks shrimp are likely to be featured as good buys at your food market. This will be a good time to treat your family to some exciting new dishes featuring shrimp

Shrimp Ho-Ho is a simple dish to prepare, but there is the exotic touch of the Orient to its flavor. Tender pink shrimp are combined with crisp sticks of cucumber, sauced with tomato cream, and garnished with pimiento. Cooked in saucepan or chafing dish, it is served over hot, fluffy rice.

SHRIMP HO-HO

1 pound green shrimp
1 medium cucumber
1 can (4 ounces) pimiento, drained
¼ cup butter or margarine
1¼ teaspoons salt
¼ cup tomato ketchup
1½ cups milk
1½ tablespoons cornstarch

Clean shrimp; split lengthwise Pare cucumber Cut into quarters; then into lengthwise strips, removing seeds Cut pimiento into strips Saute shrimp in butter in a saucepan 3 minutes. Add cucumber, pimiento and salt. cook, covered, 3 minutes Stir in ketchup and 1 cup of milk Blend cornstarch with remaining milk; stir into shrimp mixture. Cook stirring, until mixture comes to a boil and thickens slightly. Serve over hot rice. Makes 4 or 5 servings.

* * *

Shrimp and spaghetti fans will applaud this novel main dish that's been dubbed Shrimp in Traps. The 'traps' are rigatoni, the large, ribbed, tubular macaroni. The shrimp are cooked and cut in half, then stuffed into the pasta—hence the name. Actually this extra step takes but a few minutes and makes the dish a conversation piece. The sauce is a rich, full-flavored tomato sauce, based on concentrated tomato juice. Worcestershire sauce, minced parsley and celery seed add flavor interest. So does a topping of golden cheese. You can use American as called for in the recipe, or grated Swiss or Romano.

SHRIMP IN TRAPS

1½ cups rigatoni
1 pound green shrimp (½ pound cooked cleaned, split lengthwise)
1 can (6¼ oz.) concentrated tomato juice, diluted with 1 can water
1 teaspoon sugar
1 tablespoon minced parsley
1 teaspoon Worcestershire sauce
¼ teaspoon celery seed
½ cup grated American cheese

Cook rigatoni in boiling, salted water; drain; rinse. Heat oven to 350 degrees. Stuff rigatoni with shrimp. Place in 1-quart casserole. Combine juice and next 4 ingredients; pour over rigaaoni. Bake, covered, 30 minutes. Remove cover; sprinkle with cheese. Bake 15 minutes. Makes 4 servings.

* * *

With the Shrimp in Traps, serve a large salad of escarole, spinach and Bermuda onion rings. Use a dressing of 2 parts oil to 1 part vinegar. Or for something a bit different try this Broccoli Salad.

BROCCOLI SALAD

1 package (10 ozs) frozen broccoli spears
1 can (2 ozs.) flat anchovy fillets
1 pimiento, cut into strips
2 tablespoons vinegar
⅓ cup salad oil
⅛ teaspoon paprika
¼ teaspoon salt
½ teaspoon sugar
1 teaspoon minced parsley
1 teaspoon minced onion
⅛ teaspoon celery seed

Cook broccoli according to directions on package; drain, chill. On individual lettuce lined salad plates, arrange broccoli. Arrange anchovies and pimento over broccoli. For dressing, combine vinegar and remaining ingredients Shake well. Serve over salad. Will make 4-6 servings.

* * *

SEAFOOD BAKE #1

2 tablespoons butter
1 medium-size onion, finely chopped (½ cup)
½ teaspoon salt
Few drops bottled hot-pepper sauce
½ pound cooked shrimp, finely chopped
4 fish fillets (about ⅓ lb each)

Maximum Insurance $10,000 per depositor

Melt butter in fry pan; saute onions 5 minutes. Add salt, hot-pepper sauce, shrimp; saute 3 minutes. Place fish fillets in four individual casseroles; spread shrimp mixture on top of fillets. Cover casseroles tightly with aluminum foil. Bake 45 minutes at 375 derees. Remove covers; serve in casseroles Makes 4 servings

SESFOOD BAKE #2

1 pound large fresh scallops
1 tablespoon chopped onion
2 tablespoons melted butter
1 can (10 ozs) frozen condensed cream of shrimp soup
½ cup milk
1 tablespoon fine dry bread crumbs
Toast

Cut scallops into halves. Place in shallow baking dish Sprinkle with chopped onion and melted butter. Bake in a hot oven (425 degrees) 20 minutes; turn once or twice during baking Combine cream of shrimp soup with milk; heat until soup thaws Pour over scallops; sprinkle with dry bread crumbs. Bake about 5 minutes or until the crumbs are brown. Serve over toast. Makes 4 servings.

* * *

DOCK STREET SHRIMP

1 can (10 ounces) frozen condensed cream of shrimp soup
½ cup light cream
2 cups cut-up cooked seafood (lobster, shrimp, white fish)
1 tablespoon chopped parsley
1 teaspoon lemon juice
Toast

Heat cream of shrimp soup and cream until soup is thawed. Stir now and then. Add 2 cups cut-up seafood, the parsley and lemon juice; heat Serve over toast. Makes 3 to 4 servings.

* * *

In Spaghetti Shrimp Curry, tender mararoni, tasty chunks of shrimp and a marvelous combination of ingredients yield a dish of pure flavor goodness. The curry appears in just the correct amount to make this a truly irrestible dish.

SPAGHETTI SHRIMP CURRY

8 ounces elbow spaghetti
1 teaspoon salt
1 to 2 teaspoons curry powder
¼ teaspoon pepper
½ cup white seedless raisins
½ cup flaked cocoanut
½ cup chopped walnuts
½ cup chopped onion
½ cup chopped red apple
1 pound fresh shrmp, cooked, deveined, cut in pieces
1 can cream of celery soup (10½ ounces)
¾ cup water

Cook spaghetti in boiling salted water until tender, about 7 minutes Drain. Add salt, curry powder, pepper, raisins, cocoanut, nuts, onion chopped apple and shrimp. Toss lightly. Blend soup and water. Pour over shrimp mixture, blend carefully. Pour nto greased 8"x12" casserole dish (or 2 quart casserole). Bake in moderate oven (350 degrees) 25 to 30 minutes or until lightly browned and bubbly. 4 to 6 servings.

* * *

SHRIMP FIESTA

¼ cup chopped onion
3 tablespoons chopped green pepper
2 tablespoons butter or margarine
2 cans condensed cream of mushroom soup, undiluted
3 tablespoons milk
¾ pound diced, cooked shrimp
2 tablespoons chopped pimiento
1 teaspoon Worcestershire sauce
1½ cups biscuit mix (follow package directions for rolled biscuits)
⅓ cup chopped pimineto
½ cup grated process American cheese

Heat oven to 400 degrees. Saute onion and pepper in butter until tender. Add soup and next 4 ingredients; heat. Pour into 2 quart casserole Roll biscuit dough into a rectangle (12"x7"x¼"); sprinkle with pimiento & cheese. Roll lengthwise, jelly-roll fashion cut into 1-inch slices. Place on top of shrimp mixture. Bake 25 minutes. Makes 6 servings.

* * *

OYSTER SHRIMP CHOWDER

1 cup chopped celery
2 tablespoons butter or margarine
1 can (10 ounces) frozen condensed oyster stew

Best Food Buys

Lent Influences Food Promotions

The Lenten Season, which began on Wednesday of this week, promises to exert considerable influence on retail foodmarket activities in the weeks ahead, observes Tom Piper, Penn State Extension Marketing Agent Being aware of the Lenten restrictions observed by some families, many retailers will develop store features around foods appropriate to the season.

Traditionally, this is the period during which the sales of fishery products are at their annual peak. The fishing industry plans a concentrated sales promotion throughout the Lenten Season to further stimulate consumer purchases. Crab meat continues as a good buy in seafood, sharing this position with fish sticks and portions, sea bass, scallops, and shrimp in the Chesapeake market area.

Eggs and cheese are popular substitutes for meat and both items are in plentiful supply. Right now large size eggs are the best buy and the cost per serving is low-side. A wide variety of meat features is expected but at generally unchanged price levels. Lamb, turkey, ham and certain beef cuts are eligible for this consideration.

Bananas continue in the value spotlight at the produce counter. The grapefruit market continues unchanged with fruit being of good quality and peak flavor. Orange prices continue firm.

Some early strawberries are arriving from Florida but prices are on the high side.

Somewhat lower prices may be noted on tomatoes, lettuce, sweet corn, broccoli radishes, and leafy vegetables. Higher prices are in store for green beans, and cucumbers; no change likely on potatoes, carrots, peppers, onions, and cabbage.

Vine-ripened tomatoes are arriving from Florida in good condition and are reasonably priced. Shipments of green onions from Texas and Arizona and rhubarb from the greenhouses of Ohio may add a touch of spring to your winter menu. Look for a good buy in mushrooms, located at the meat counter in most markets.

● Shrimp

(From page 9

electric mixer or rotary beater, beat cheese until smooth. Add remaining ingredients; beat just until smooth Overbeating will make dip too thin) Chill. Serve as a dip with crackers, potato chips, or corn chips, etc Makes 1½ cups

CHOCOLATE CHERRY SQUARES

1 cup rolled oats, quick or old-fashioned
⅓ cup sifted enriched flour
⅓ cup brown sugar
½ cup butter or margarine
13 maraschino cherries
6 ounces (6 squares) semi sweet chocolate, melted

Heat oven to moderate (350 degrees). Combine oats flour and brown sugar Cut in butter until mixture resembles coarse crumbs. Press into ungreased 8-inch square pan. Bake in preheated oven 15 to 20 minutes. While warm, cut into 25 squares.

Melt chocolate over very low heat, (may use double boiler). Cut cherries in half drain well. Place squares on waxed paper; put half cherry on each; top with 1 teaspoon melted chocolate Refrigerate Makes 25 squares

* * *

TOASTED PECANS

3 tablespoons margarine
2 cups pecan halves
Salt

Heat oven to moderate (350 degrees). Melt margarine in a shallow baking pan Add pecans and stir until coated with the melted margarine. Place in oven for about 12 to 15 minutes until lightly toasted Remove from oven Cool pecans on heavy brown paper Salt lightly while still warm

DIRECTORS OF THE LANCASTER COUNTY Farm Bureau Cooperative Association after their election Wednesday are left to right Veryl E. Brown, Peach Bottom R1; Southeastern District, Paul Hershey, Manheim R4, Northwestern District; Amos H Funk, Millersville R1, Southwestern District, and Willis Z. Esbenshade, 1631 Esbenshade Road, Lancaster, Northeastern District — F Photo

Co-op

(From page 1)

market his products through other farmer cooperatives In this way the farmer has control of all the processes involved in the total agricultural industry. The use of cooperatives, he said, enables the farmer to run a completely integrated business

The association voted to change the by-laws of the county association to make it possible to hold the annual meeting on any date between December 1 and April 1, at the discretion of the directors. At present the date of annual meeting was restricted to the period between January 1 and April 1

In other business, the association accepted the resignation of Harry R Metzler, secretary - treasurer of the Lancaster County Farm Bureau Cooperative Association for the past 20 years Metzler resigned, he said, in order to spend more time in the insurance business. His successor will be elected at the next meeting of the association's board of directors

Willis Z Esbnshade, president of the assn| told the 510 members and friends at the 26th annual meeting, the cooperative will not need to borrow capital to finance new facilities at Quarryville.

He said enough Preferred stock, was purchased by patrons to build the proposed new Quarryville branch. The dividend rate on Preferred stock was increased by stockholders last year from four to five per cent.

The cooperative reported net savings of $61,921 for the fiscal year ended Oct. 31, 1960, compared with $113,-741 the previous year — a decrease of $51,820

The dollar volume of patron purchases and marketing, at $4,228,369, was $251,-190.78 less than the $4,479 - 559 78 reported for the previous year.

Patron feed purchases continued to lead the cooperatives sales total at $1,631,566

Stockholders reelected 5 directors to the board Thev were Paul Hershey, Manheim R4, Amos H Funk, of Millersville R1; Willis Z Esbenshade, 1631 Esbenshade Rd, and Veryl E Brown, of Peach Bottom R1.

In addition to management reports, guest speakers included County Agent M M Smith

Manheim

(From page 1)

vania, the United States, the world and how something can and must be done to stop its ruining forces As the title points out many farms are closer to destruction than we may realize

Earnest Martin, secretary In my speech I point out some of the expenses and receipts of the modern farmer Modern farming is the Nation's biggest industry I show the investments made in agriculture and how much the farmer spends for the production of crops and clothing each year Farming is the most progressive industry today, and one hour of farm labor produces four times as much food as it did in 1920. For production of the food, the farmer gets only 38 per cent of the total spent.

Glenn Henry, treasurer: My speech is entitled, The Farm Problem. In the beginning of my speech I discuss the three farm problems which are the lack of ballance in farming, the impact of agricultural adjustment on social institutions, and imballance between total output and total demand for farm products Later I discuss different ways of getting rid of the farm problem and I conclude with my own ideas of how to deal with the problem

Glen Bricker, sentinel: Since the prices of farm products are going down because of farm surplus, I try to explain how the farmer can make a profit from grassland farming In my speech, "Green Gold", I point out the example of the cost to produce 100 pounds of total digestible nutrients from pasture at 70 cents compared to the same amount from wheat at $2 56 I stress the advantage of grazing and feeding grass silage

John Henry Hess, chaplain In my speech, "Coming —Custom Built Packages of Technology", I am trying to give the farmers a picture of the changes they will likely be making in order to continue farming For example, my speech points out that the cost of fertilizer and petroleum products are likely to register only slight advances while farms with assets of $200,000 to $500,000 are going to become much more common

Harold Myers, reporter, "Bargaining Power" is one of the big problems that the farmers of today are working on I point out how important it is for the farmers to stick together and form bargaining associations before they can get the bargaining power they need so badly

---

The cellophane bags containing carrots cost three times as much as the farmer got for the carrots

K-137 KimberCHIKS

Donegal FFA Lists Activities

Donegal Witness Oak FFA chapter plans projects for National FFA Week this year They are going to supply place mats in two local diners, place posters and some other activities. Also, they plan to butcher several pigs and make sausage.

Membership in the FFA is made up of farm boys who are students of vocational agriculture in high school. The organization's activities are designed primarily to help develop rural leadership and good citizenship, and to stimulate the boys to better achievement in their study and work toward successful establishments in farming or other agricultural occupations.

The Donegal Witness Oak FFA chapter has 34 members Officers are: Larry Heistand, president; Barry Earhart, vice president; Walter Mowrer, secretary; Clair Mummau, treasurer; Lloyd Heisey, reporter; Ron Ober, sentinel and Glen Musser, chaplain. Grant Miller, vocational agriculture instructor in Donegal high school, serves as advisor of the FFA chapter.

Harrisburg Man On PENEB Staff

Clarence M. Wilson of Harrisburg, Pa., has been named assistant director of finance and membership for the Poultry and Egg National Board, Chicago, according to an announcement by Lloyd H Geil, general manager.

Wilson will assist Kenneth K. Heideman in PENB's expanding finance and membership program.

Since 1951, he had served as executive secretary of the Pennsylvania Farmers' Association. In this position he succeeded in enlarging the membership from 500 to 10,000.

For the past 20 years he has worked with producers and processors and thoroughly understands their interests

● Solanco

(From page 1)

president, William Maule, is a member of our chapter. He and Barry Smith, our chapter president, are the members who received the coveted Keystone Degree.

Early in the school year Janet Bollinger was selected as Solanco Chapter Sweet heart, and she has officiated in that capacity at several of our chapter functions.

The Solanco chapter, FFA participated in the livestock judging contest at the Lampeter Fair in October, and in the Forage and Tobacco judging contests at the New Holland Fair. The members of the chapter attended th Penna. State Farm Show at Harrisburg

Future plans for this scho ol year include a Father and Son banquet, scheduled for April 14, a spring dance, and a trip for the senior vo-ag boys We are also working on a program of sports — basketball, volleyball, and ping-pong — in preparation for the Lancaster County tournament. A parlimentary proceedure team is being readied to compete in the county contest in April.

Some of our shop projects include a hog house, hog feeders, feed chest, truck racks and tool repairing. We have also assembled two new manure spreaders for a local dealer.

The Solanco Chapter of Future Farmers of America has 62 members.

National FFA officers (there are six) travel extensively. During his year's term of office each officer will travel 50,000 miles or more, and spend about two-thirds of his time working in the interest of the FFA

Each year, about 10,000 persons attend the national FFA convention. It is held in October at Kansas City, Mo.

ANY DAIRY FARMER
that reads this ad and is interested in putting on a few good Wisconsin milk cows to step up your milk production, please drop us a card right away giving your name, location and telephone number and we will contact you right away at your farm.

Look your herd over and check them over closely and cull out your beef to make room for good cows We have a very good market for your culls and any kind of beef cows that you might want to trade. We are receiving 2 to 5 trailer loads a week from Wisconsin. Delivery can be arranged for most anywhere in Pennsylvania right to your farm If you would prefer to take a drive over to our cattle farms, take the Penna. Turnpike which leads on to the N. J. Turnpike then get off at N. J. Exit no. 5, turn right towards Mount Holly, and stop at first gas station and telephone us and our fieldman will come and lead you over to our cattle farms. Our cattle farms are located on each side of Highway 206, 1½ miles this side of Vincentown, N J. or about 6 miles from N J Turnpike Exit no 5 Look for eight silos, 4 silos on each side of highway, also telephone us the night before for an appointment to meet us.

First Annual Soils Day Is Scheduled For County

By: M. M. Smith, County Agent

The importance of proper soil management from all angles will be stressed at the first Lancaster County Soils Day set for Tuesday, February 28, 1961, at the Penna. Guernsey Sale Pavilion, Lincoln Highway East. This educational meeting is being sponsored by the Agricultural Extension Service and is open to all farmers in the county and surrounding counties.

The morning session, beginning at 9.30, will feature the following topics and speakers—

"Soil Organic Matter and Cover Crops", James H. Eakin, Agronomy Extension Penn State Usiversity; "How Do We Get Proper Plant Food", F. A. Raymaley, American Cyanamid Co., Alloway, New Jersey; "Your Soil Testing Service", James H. Eakin, Agronomy Extension; "The latest on Fertilizer Placement", John E. Baylor, Agronomy Extension, Penn State University.

Lunch will be available on the premises.

During the afternoon session, the program will include the following: "Proper Weed ontrol" George H. Berggren, Agronomy Extension, Penn State University; "Take a Good Look at Nitrogen", James H. Eakin, Agronomy Extension; "Economics of Good Crop Fertilization", Fred A. Hughes, Ago. Economics Extension, Penn State University.

After a discussion period, adjournment is scheduled for 3 p.m.

In addition to the above presentations there will be a number of educational displays and exhibits on hand.

● County Agent

(From page 1)

tion banquet that the primary function of the county agent's office continue to be to give out information to farmers and homemakers.

To meet the needs of tomorrow's youth, Smith said the Extension program will have to be aimed at reaching the farm boy and girl who will not be going into farming but into some other branch of Agindustry.

Smith said the standard farm production 4-H clubs are giving way to newer clubs such as the electric club, automotive clubs, plan and plant for beauty clubs; and the newest county 4-H club—the Town and Country club. In the latter, young people will explore the field of marketing and processing of farm products. Smith noted a great need for this type of education.

Smith asked for patience in accepting the replacement of Harry Sloat, retired Associate County Agent. He said the local staff is splitting up Sloat's duties until a replacement is named.

The association reelected one committee member and elected four new members Mrs. J. Everett Kreider, of Quarryville R1, was chosen to remain on the executive committee along with the new members J. Richard Kreider, Manheim R3; C. Warren Leininger, Denver R2; Leroy K. Andrews, Lancaster R7, and Melvin R. Stoltzfus, Ronks R1.

More than 50,000 boys each year get leadership experience by serving as an officer of a local FFA chapter.

It takes about 60,000 blue corduroy jackets each year to satisfy the demands of FFA members throughout the nation.

The first use of "Future Farmers" as the name of an organization of vocational agriculture students was by the "Future Farmers of Virginia," in 1926.

The American Farmer degree is awarded to about 375 outstanding FFA members each year. Only one member in a thousand may receive it.
